Study of Population Displacement & Return Movements

INTRODUCTION

Despite the deteriorating conditions in Syria, some refugees and IDPs return to their original places. This infographic presents information on these populations in areas outside the regime control. ACU's enumerators constantly track these populations, along with movements of displacement and return.

This study presents the total number of populations and gender ratio, the total number of old and new IDPs and their types of shelters, the number of those who left and the reasons for leaving, and the number of returnees last month with their most critical needs.

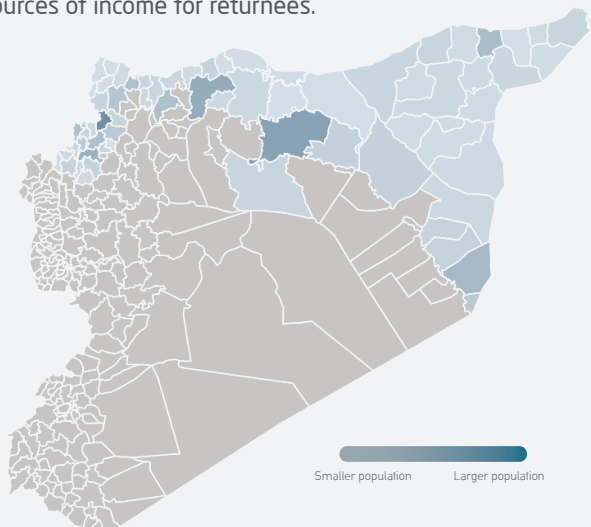

The study also presents information on local councils in the return areas last month, availability and evaluation of basic services, decision-makers and primary service providers, and sources of income for returnees.

67 Total number of assessed sub-districts

2,284
Communities

499
Total number of assessed camps

TOTAL STATISTICS

9,221,973
Population

3,229,095
IDPs

5,095
New IDPs

858
Departures

42
Returnees

TOP DISTRICTS WITH THE LARGEST NUMBER OF IDPS

1,660K Harim
956K Idleb
789K Ar-Raqqa
605K Menbij
599K Abu Kamal
574K A'zaz
500K Quamishli
499K Afrin
