The **Information Management Unit (IMU)** aims to strengthen the decision-making capacity of aid actors responding to the Syrian crisis by collecting, processing, and sharing information about the humanitarian situation in Syria. For this purpose, the IMU has a wide network of enumerators who have been recruited depending on specific criteria such as their level of education, the web of their social relationships with different key sources of information, as well as their ability to work under pressure and to communicate in an efficient manner. IMU collects data which is difficult to access by international aid actors, and it releases different types of information outputs including maps, daily situation reports, flash reports on specific issues, camp monitoring reports, monthly reports (food-price index), and thematic reports.

For more information and to access to IMU products, please visit: [www.acu-sy.org](http://www.acu-sy.org). You can also write to us directly at: [imu@acu-sy.org](mailto:imu@acu-sy.org) and call us on: +90-342-22-010/77/88/99.

## SUMMARY

During September, there were a couple of successive unfortunate events that led to forming more random camps and overloaded the already existing camps. A new exodus took place between 13 and 15 September out of rural Hama due to the heavy bombardment and the fierce battles in the district. More than 2035 households were displaced from 6 villages in rural Hama to Idleb's camps; particularly Atma, Al Karama and Al Rahma Clusters that were over-crowded.

Another exodus took place in Saraqeb City towards the neighbouring villages due to the heavy non-stopping air raids during the whole month. More than 3000 households were displaced to the neighbouring villages. Some families are living in random camps and others in informal settlements, while 400 families are living in the open. However, our enumerators could not reach those camps to get any information.

A total of 130 camps in 10 camp clusters were assessed during September 2014. Data collection was carried out through IMU's network of 22 enumerators and funded by ACU. Key findings presented in further details in this report include:

- Humanitarian situation analysis contains an updated data for 5 sectors:
- There was a reduction in the food sector. The level of offering aids to camps lowered during this month after being improved during the previous month due to the UN resolution 2165.
- Health situation has not witnessed big differences since July, so the health services are still in bad situation. The shortage of the medical staff, medicine, and medical points is still a substantial problem for all camps.
- Education sector needs support for the new academic year. Aid was provided for preparing schools, teaching materials and teaching staff. ACU distributed the aid offered by the Saudi Campaign. The number of students who attend schools increased to (10,328) after it had been (8,169) which referred to (26%) increase.
- Some INGOs are working on WASH sector to raise the level of services among IDPs. Two wells were dug in Al Rahma Cluster where the water proportion per person increased notably. However, the majority of clusters still suffer from lack of toilets and showers, especially Atma Cluster.

Finally, the greatest concern of the IDPs is to be prepared for the rainy season, so all IDPs demand their tents to be replaced, roads to be gravelled, and water drainages to be provided, as initial steps of winterization.

ACU conducted an assessment of winterization and shared the findings with the partners in the CCCM.

## INTRODUCTION

One of ACU's main mandates is to coordinate humanitarian aid for affected IDPs in northern Syria camps. This duty involves providing accurate information in certain periods about the humanitarian situation in those camps, especially in the environments where security issues limit the access to information. Therefore, the 14th edition of the camp monitoring monthly report is released; it presents an assessment about the living conditions inside one hundred thirty camps in ten different camp clusters in the North of Syria.

This report keeps the donors, neighbouring country governments, and other humanitarian agencies up to date with actual changes during September 2014.

The report's first objective is to provide decision makers with comprehensive and operational information about IDP camps, in order to get the best responses about the dynamic situation of those camps, and to setup a continuous monitoring system to evaluate the effects of these responses on the living standards of the IDPs in those camps. Secondly, the report aims to support the coordination among all relevant humanitarian agencies including communities, international NGOs and the UN that play a role in responding to the Syrian crisis and to promote accountability across them.

This report is divided into four main parts:

The first part shows the population demography, and thus clarifies the impacts of war on IDPs.

The humanitarian situation analysis is covered in the second part showing the food situation, health services, water and sanitation, education, shelter and NFIs.

The third part tackles "need priorities" in camps assessing the needs, analysing them, then classifying them into first, second and third priority ranks.

The fourth part is assigned to talk about humanitarian actors who play a big role in providing humanitarian aid to all camps.

Annexes II and I include tables with details of camps in each cluster, number of families, and number of persons in each camp.

Annex III includes detailed maps for the geographical sites of most camps in northern Syria, where the IMU's enumerators traced the boundaries of these camps in order to install the geographical locations of these camps to facilitate the work of humanitarian organizations interested in aid delivery to those IDP camps.

## METHODOLOGY

This section provides an overview of the methodology used for the assessment. The overall approach combines quantitative and qualitative methods. The assessment includes: 1) key informant interviews with people in charge of the camps, 2) direct field observations and sample testing done by enumerators, and 3) review of registration data available at camp management offices. Population information was gathered tent by tent. High priority needs of the IDPs were evaluated via live group meetings and observations with camp residents.

### ASSESSMENT SAMPLE

This report covered 130 camps in northern Syria grouped within 10 clusters in three governorates (Aleppo, Idleb, and Lattakia).

### ASSESSMENT TOOLS

The tools used in this assessment include a questionnaire designed depending on a questionnaire certified by OCHA.

The questionnaire was conducted by enumerators through key informant interviews with IDPs and camp managers.

## DATA COLLECTION

The data collection phase started on September 20th, 2014 and was completed within 10 days. Data collection was carried out through IMU’s network of enumerators based at camps in northern Syria. In total, 22 enumerators, who are residents in the camps, contributed to this assessment. These enumerators have been recruited by IMU based on specific criteria such as their level of education, the web of their social relationships, notably with local community, camp managers and other key sources of information, as well as their ability to work under pressure and to communicate in an efficient manner.

Enumerators selected by IMU have an extensive knowledge of the camps where they are based. For instance, they were quickly able to get the contact information of each camp manager in the cluster, observe all details and monitor the conditions of IDPs.

## DATA MANAGEMENT AND ANALYSIS

IMU Data Management Officer received the collected data on paper and proceeded with data entry, using excel sheets.

Upon consolidation of the collected data, IMU data analysis team proceeded with data visualizations by identifying the required tables, graphs, and maps; which will feed into the analysis of assessment findings. Data visualization was conducted using MS Excel program. IMU GIS officer produced the maps using Arc GIS software. As for the frontiers of the camps, ACU’s enumerators worked hard to trace them, and they keep updating any related information.

## POPULATION

The fierce battles and the heavy bombarding in Idleb led to influxes towards some camps in rural Idleb, which resulted in overcrowding them. On the other hand, Bab Al Salameh camp witnessed a decrease in inhabitants’ number due to the fact that some households moved to the new camp in Sijjo which consisted of caravans. IDPs in Jarablus cluster were still moving into Turkey, which led to an ongoing increase in IDP numbers inside camps.

FIGURE 2, POPULATION DEMOGRAPHY IN CAMPS FROM AUGUST 2013 TO SEPTEMBER 2014

**TABLE 2, POPULATION IN CAMP CLUSTERS IN SEPTEMBER 2014**

Cluster	Atma	Al Karama	Al Rahma	Qah	Sarmada	Salqin	Bab Al Salameh	Jarablus	Yamadia	Grand Total
# of Families	5,814	5,183	2,144	2,233	179	1,226	2,317	548	176	19,820
# of Individuals	38,310	29,842	12,177	12,470	928	5,757	15,062	2,795	953	118,294
# of Males	18,023	14,408	6,087	6,183	448	2,628	7,377	1,382	485	57,021
# of Females	20,287	15,434	6,090	6,287	480	3,129	7,685	1,413	468	61,273
# of 0 - 2 Years	5,168	3,156	1,388	1,384	97	734	2,217	352	196	14,692
# of 2 - 6 Years	4,316	3,759	1,623	1,450	90	818	1,619	318	0	13,993
# of 6 - 12 Years	5,930	5,515	2,081	2,136	128	1,154	2,890	512	179	20,525
# of 12 - 18 Years	5,807	5,232	2,032	2,265	153	764	2,623	445	240	19,561
# of 18 - 50 Years	13,812	10,087	4,445	4,534	376	2,035	4,799	1,050	228	41,366
# of >50 Years	3,277	2,093	608	701	84	252	914	118	110	8,157

The table below refers to cases with special needs inside the camps:

- The number IDPs who suffer from disabilities (physical disability, mental disability, birth defect, disability due to injury) increased to (776). ACU is conducting an assessment that aims at getting more support for those vulnerable people in camps.
- A total of (1,282) women are responsible for supporting their families financially.

The following table also gives the number of unaccompanied minors and elders.

**TABLE 3, VULNERABLE POPULATION IN CAMP CLUSTERS IN SEPTEMBER 2014**

Cluster	Atma	Al Karama	Al Rahma	Qah	Sarmada	Salqin	Bab Al Salameh	Jarablus	Yamadia	Grand Total
#of Disables	153	259	107	115	11	87	26	11	7	776
# of Female headed households	389	316	275	117	11	75	24	60	15	1,282
# of Unaccompanied minors	24	76	4	5	0	3	0	10	0	122
#of Unaccompanied elders	56	60	54	13	3	24	0	15	1	226

## HUMANITARIAN SITUATION

This section presents the key findings from the assessment and are structured into two sub-sections. The first one covers the humanitarian situation analysis in the camps and provides updated information about five sectors: food security, health, WASH, education, shelter and NFIs. The second sub-section talks about the humanitarian assistance that was provided to camps inside Syria during September 2014.

### FOOD SECURITY

Food aids offered by INGOs were reduced notably during this month. Although the UN resolution 2165 was still valid, no aids were distributed in camps by SARC. Both Jarablus and Yamadia camps still suffered from the complete absence of the main food, bread. In addition, Atma camp suffered from the lack of bread. Concerning food priorities, increasing the food amount was still ranked first with 54%, while the variety of food came as the second priority with 45%.

FIGURE 3, FOOD PRIORITIES FOR IDPS IN ALL CAMP CLUSTERS DURING SEPTEMBER 2014

## HEALTH

Health status is still the same in camps, and it needs an intervention to raise up the quality of health services

TABLE 4, DOCTORS AND MEDICAL POINTS

Cluster	Atma	Al Karama	Al Rahma	Qah	Sarmada	Salqin	Bab Al Salameh	Jarablus	Yamadia
# of Doctors	4	7	1	8	0	3	8	3	0
# of Medical points	3	2	1	6	0	2	2	1	1
Individuals/doctor	9,145	4,029	12,225	1,675		2,666	2,170	1,270	
Individuals/medical point	12,193	14,102	12,225	2,234		2,666	8,681	3,810	946

The table above shows the numbers of doctors and medical points in camp clusters. Notably, Sarmada and Jarablus clusters are in acute need for doctors and medical points. Yamadia cluster has only one poor medical point where there is no doctor with regular attendance nor sufficient medicine.

Number of births in the month of September reached 76 births, and there were 15 deaths in the clusters, 2 of the deceased were children under 5, and the other 13 were people more than 5 years old.

TABLE 5, BIRTHS AND DEATHS IN CAMP CLUSTERS IN SEPTEMBER 2014

Cluster	Atma	Al Karama	Al Rahma	Qah	Sarmada	Salqin	Bab Al Salameh	Jarablus	Yamadia	Grand Total
# of Births	27	15	11	6	0	6	2	7	2	76
# of Deaths under 5 years	0	0	0	0	0	0	0	2	0	2
# of Deaths over 5 years	3	3	1	1	1	0	2	2	0	13

Increasing the number of medical points was an urgent need for 62% of the camps and it came as the first priority, while providing medicine was the second priority for 52% of camps.

FIGURE 4, HEALTH PRIORITIES IN CAMP CLUSTERS IN SEPTEMBER 2014

## WATER AND SANITATION AND HYGIENE (WASH)

This sector is on continuous progress due to the intervention of several INGOs assessing the situation on different levels. Although we have not reached the world-class quality standards for all elements of this sector, the numbers indicate clear improvement in all camps' situations.

**According to Sphere standards, each person needs (15 L) of clean water daily.**

Fortunately, the average of daily water portion per person is sufficient in all clusters; as shown in the table below.

TABLE 6, DAILY WATER SITUATION IN CAMP CLUSTERS DURING SEPTEMBER 2014

Cluster	Atma	Al Karama	Al Rahma	Qah	Sarmada	Salqin	Bab Al Salameh	Jarablus	Yamadia
Liters of water trucking/day	252,000	372,400	297,000	57,003	34,460	84,600	60,000	0	0
Liters of water from fixed source/day	460,360	250,000	32,000	217,000	0	0	320,000	136,000	15,000
Liters/person/day	18.6	20.9	27.0	22.0	37.1	14.7	25.2	48.7	15.7

**According to Sphere standards, every (250) persons should have access to at least one onsite water point.**

The survey shows that all the clusters in study have sufficient number of water points as shown in the table below.

TABLE 7, WATER POINTS NUMBERS IN CAMP CLUSTERS IN SEPTEMBER 2014

Cluster	Atma	Al Karama	Al Rahma	Qah	Sarmada	Salqin	Bab Al Salameh	Jarablus	Yamadia	Grand Total
# of Onsite water points	297	316	86	162	11	279	100	139	7	1,397
# of Persons/ onsite water point	129	94	142	77	84	21	151	20	136	85

The showers situation deteriorated in September, especially in Atma cluster. 1,277 individuals share only one shower in that cluster, and this is a big number compared to other clusters. In addition, Sarmada and Yamadia camps suffer from complete absence of showers for more than three months.

TABLE 8, NUMBER OF SHOWERS IN CAMP CLUSTERS IN SEPTEMBER 2014

Cluster	Atma	Al Karama	Al Rahma	Qah	Sarmada	Salqin	Bab Al Salameh	Jarablus	Yamadia
#of Showers	50	190	70	116	0	103	106	69	
# of Functioning showers	30	167	70	116	0	96	106	69	
Persons/shower	1,277	179	174	108		60	142	41	

**According to Sphere standards, every twenty (20) persons should have access to one proper toilet.**

The numbers shown in the table below are much less than Sphere standards almost in all clusters, except Salqin cluster where 15 individuals share one toilet.

TABLE 9, NUMBER OF TOILETS IN CAMP CLUSTERS IN SEPTEMBER 2014

Cluster	Atma	Al Karama	Al Rahma	Qah	Sarmada	Salqin	Bab Al Salameh	Jarablus	Yamadia
# of Toilets	638	1,006	419	343	38	451	224	112	24
# of Functioning toilets	624	923	369	327	38	391	224	112	18
Persons/toilet	61	32	33	38	24	15	67	25	53

**According to Sphere standards, every ten (10) families should be provided with one garbage bin.**

It is obvious that all camps need more garbage bins except Salqin, Sarmada and Bab Al Salameh clusters where the number of bins is sufficient.

TABLE 10, NUMBER OF GARBAGE BINS IN CAMP CLUSTERS IN SEPTEMBER 2014

Cluster	Atma	Al Karama	Al Rahma	Qah	Sarmada	Salqin	Bab Al Salameh	Jarablus	Yamadia
# of Bins	244	85	89	45	17	127	325	11	9
Persons/bin	157	351	137	277	55	45	46	254	106

The first priority for 26% of IDPs is maintaining water points and improving their quality, while the need for additional showers came in the second place for 29% of the IDPs.

FIGURE 5, WASH PRIORITIES IN CAMP CLUSTERS IN SEPTEMBER 2014

**Waste management:** The vast majority of camps use soak pits in order to manage organic waste. Several INGOs provide assistance by emptying these soak pits and transporting waste to remote areas. However, no information about the disposal of this waste is available.

## EDUCATION

September marked the beginning of the new academic year. Education sector witnessed a significant improvement with an increase in the number of students attending schools to reach (10,328) students i.e. (26%) higher than the number of last year. In addition, the number of schools went up as in the case of Al Karama and Qah Clusters with the establishment of two new schools in each cluster as well as a new school in Salqin Cluster. However, Sarmada Cluster is still suffering from a complete absence of schools inside the cluster. As for Jarablus Cluster, the students can attend schools in Jarablus City since they are not far from cluster.

The majority of schools received support from local and international NGOs. Furthermore, ACU distributed educational aids offered from Kingdom of Saudi Arabia.

**TABLE 11, NUMBER OF SCHOOLS IN CAMP CLUSTERS IN SEPTEMBER 2014**

Cluster	Atma	Al Karama	Al Rahma	Qah	Sarmada	Salqin	Bab Al Salameh	Jarablus	Yamadia	Grand Total
# of Schools	6	5	2	6	0	2	1	0	1	23
# of Children (6-12) attending school outside the	1,788	1,135	113	115	0	0	0	0	0	3,151
# of Children (6-12) attending school in the camp	1,930	779	735	740	0	993	1,825	0	175	7,177

The first high priority remained the same, building new schools for 70% of camps, while the second priority was to rehabilitate and equip existing schools for 60% of the camps, as it is shown in the figure below.

**FIGURE 6, EDUCATION PRIORITIES FOR CAMP CLUSTERS IN SEPTEMBER 2014**

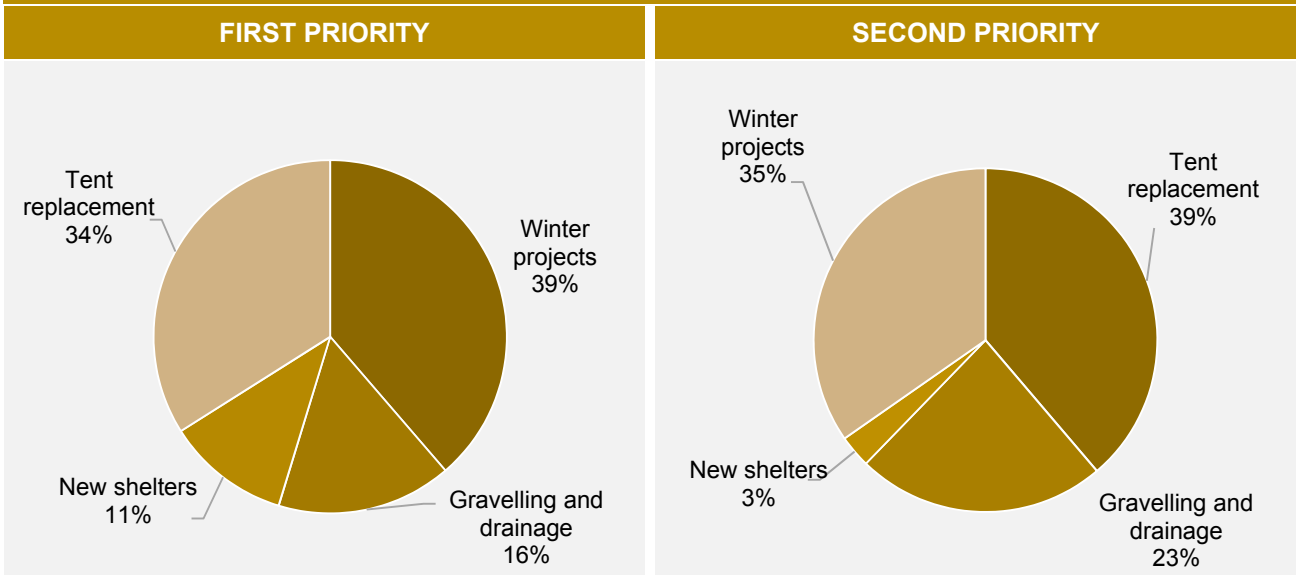

## SHELTER AND NON FOOD ITEMS (NFIS)

Due to the new IDP influxes that took place during this month, new tents were distributed to camps especially to those which received the new arrivals in Atma, Al Karama and al Rahma Clusters.

There is still a critical need to replace a lot of deteriorated tents before the advent of winter. In addition, many households in camps still host other families. Therefore, there is a constant need for new tents.

Winter projects were ranked as the first priority for 39% of camps. Tents replacement came as the second priority for 39% of the camps. ACU implemented a questionnaire to assess the winter needs and shared it in CCCM working group.

**FIGURE 7, SHELTER PRIORITIES IN CAMP CLUSTERS IN SEPTEMBER 2014**

A health awareness campaign was still going on among the camps, and large number of hygiene kits and women hygiene kits were distributed in all camps to prevent the spread of gynecological diseases that had appeared among the women there.

Figure 8 shows the top two priorities for the NFIs. Mattresses were ranked as the first priority for 31% of the camps, while Hygiene kits were the second priority for 38% of the camps.

**FIGURE 8, NFI PRIORITIES FOR CAMP CLUSTERS IN SEPTEMBER 2014**

## PRIORITIES

The Syrian crisis has begun its fourth year, and in spite of the large number of humanitarian relief organizations working on the Syrian ground; the first priority remains the same, food, for most IDPs. This result reflects the failure of humanitarian relief activity systems to facilitate living conditions for Syrian people affected by the crisis.

Education was ranked as second priority, while health services were ranked as third priority among IDPs in camps, as shown in the following tables.

**TABLE 12, FIRST PRIORITIES FOR IDPS IN THE CAMPS IN SEPTEMBER 2014**

Cluster	Atma	Al Karama	Al Rahma	Qah	Sarmada	Salqin	Bab Al Salameh	Jarablus	Yamadia	Grand Total
Food	19	18	9	4		2		4		56
Education	2	4	2	2						10
WASH	3	2	4	4		1				14
Shelter	10	5		1			1			17
Health	1	1	1	1					1	5

**TABLE 13, SECOND PRIORITIES FOR IDPS IN THE CAMPS IN SEPTEMBER 2014**

Shelter	3	7	2	1				1		14
Food	12	2	2							16
WASH		2	2			1	1			6

## HUMANITARIAN ACTORS

There were not significant changes during September 2014 for main humanitarian actors who play a big role in providing humanitarian aid to all camps. International Non-governmental Organizations (INGOs) and United Nations played the largest part 62% in delivering humanitarian aid to camps, Local Non-governmental Organizations contributed in 34% of aid delivery, while local councils role was limited to 4% among camps. Figure 9 below shows humanitarian actors' proportion during the month of September 2014.

FIGURE 9, HUMANITARIAN ASSISTANCE ACTORS IN CAMP CLUSTERS IN SEPTEMBER 2014

## ANNEX I

TABLE 15, CLUSTERS INFORMATION IN SEPTEMBER 2014

Cluster	Cluster code	Governorate	Governorate Code	District	District Code	Sub-District	Sub-District Code	Community	Community Code	Count of Camps
Atma	CL0701	Idleb	SY07	Harim	SY0703	Dana	SY070301	Atma	C4130	37
Al Karama	CL0702	Idleb	SY07	Harim	SY0703	Dana	SY070301	Qah	C4131	37
