Study of Population Displacement & Return Movements

INTRODUCTION

Despite the deteriorating conditions in Syria, some refugees and IDPs return to their original places. This infographic presents information on these populations in areas outside the regime control. ACU's enumerators constantly track these populations, along with movements of displacement and return.

This study presents the total number of populations and gender ratio, the total number of old and new IDPs and their types of shelters, the number of those who left and the reasons for leaving, and the number of returnees last month with their most critical needs.

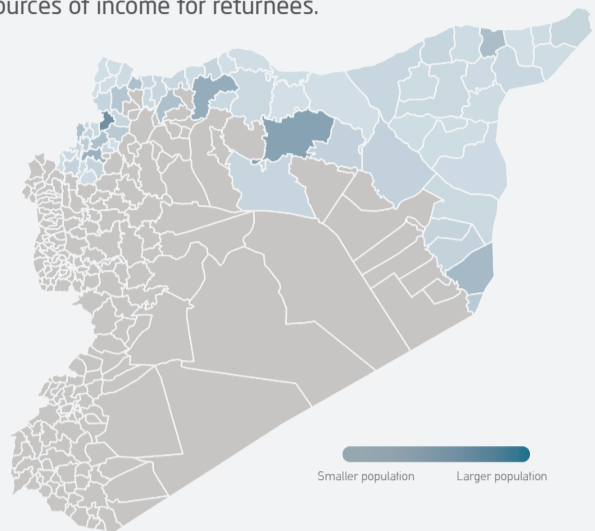

The study also presents information on local councils in the return areas last month, availability and evaluation of basic services, decision-makers and primary service providers, and sources of income for returnees.

68 Total number of assessed sub-districts

2,737
Communities

596
Total number of assessed camps

TOTAL STATISTICS

9,698,864
Population

818
New IDPs

4,857
Returnees

3,358,240
IDPs

3,826
Departures

TOP DISTRICTS WITH THE LARGEST NUMBER OF IDPS

194K	Harim
74K	Afrin
73K	Idleb
68K	A'zaz
49K	Al Bab
48K	Ar-Raqqa
28K	Jebel Saman
27K	Jisr-Ash-Shugur
14K	Jarablus
13K	Quamishli
