

Cholera Deaths in Northwest Syria

Death case No. 21

70-year-old women

Zoghra camp, Jarablus district, Aleppo governorate.

Date of onset: 15-Feb-2023.

Date of death: 16-Feb-2023.

On the morning of 15-Feb-2023, the patient complained of sudden severe watery diarrhea and vomiting; at 10.00 pm she arrived at the Jarablus hospital (by a private car) in a bad condition with severe dehydration. She was admitted to the hospital, and a few hours later she was transferred to ICU. The lab results in the hospital showed an abnormality of the electrolytes. A stool sample was not collected.

On 16-Feb-2023 at 6.00 pm, she died.

The deceased did not have a history of diseases, and there were no similar cases at home.
