## Study of Population Displacement & Return Movements

### INTRODUCTION

Despite the deteriorating conditions in Syria, some refugees and IDPs return to their original places. This infographic presents information on these populations in areas outside the regime control. ACU's enumerators constantly track these populations, along with movements of displacement and return.

This study presents the total number of populations and gender ratio, the total number of old and new IDPs and their types of shelters, the number of those who left and the reasons for leaving, and the number of returnees last month with their most critical needs.

The study also presents information on local councils in the return areas last month, availability and evaluation of basic services, decision-makers and primary service providers, and sources of income for returnees.

69

Total number of assessed sub-districts

2,768

Communities

708

Total number of assessed camps

### TOTAL STATISTICS

9,697,116

Population

2,965

New IDPs

905

Returnees

3,419,098

IDPs

6,044

Departures

### TOP DISTRICTS WITH THE LARGEST NUMBER OF IDPS

185K	Harim
79K	Idleb
78K	A'zaz
75K	Afrin
48K	Ar-Raqqa
30K	Al Bab
29K	Jebel Saman
28K	Jisr-Ash-Shugur
15K	Jarablus
13K	Qamishli

### GENDER

54%  
Females

46%  
Males

### DEPARTURES

6,044  
TOTAL NUMBER OF DEPARTURES

#### Reasons for Departing

- 1 Their towns are not serviced
- 2 The lack of job opportunities in their towns
- 3 Humanitarian assistance is not provided in their towns
- 4 Shelling and clashes

### SHELTER TYPES FOR IDPs

Rented houses | 250,848
