## Study of Population Displacement & Return Movements

### INTRODUCTION

Despite the deteriorating conditions in Syria, some refugees and IDPs return to their original places. This infographic presents information on these populations in areas outside the regime control. ACU's enumerators constantly track these populations, along with movements of displacement and return.

This study presents the total number of populations and gender ratio, the total number of old and new IDPs and their types of shelters, the number of those who left and the reasons for leaving, and the number of returnees last month with their most critical needs.

The study also presents information on local councils in the return areas last month, availability and evaluation of basic services, decision-makers and primary service providers, and sources of income for returnees.

69

Total number of assessed sub-districts

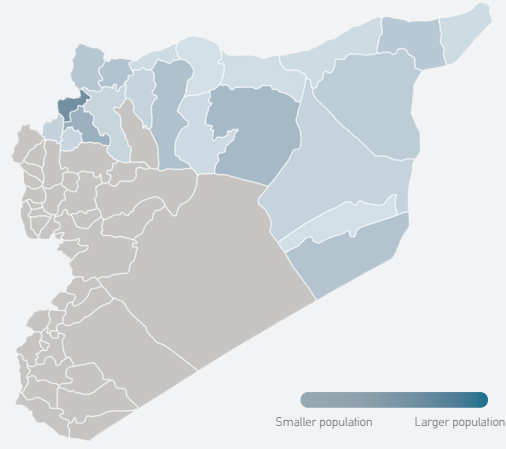

2,774

Communities

706

Total number of assessed camps

### TOTAL STATISTICS

9,864,187

Population

179,957

New IDPs

4,984

Returnees

3,584,718

IDPs

34,874

Departures

### TOP DISTRICTS WITH THE LARGEST NUMBER OF IDPs

202K	Harim
83K	Idleb
82K	A'zaz
82K	Afrin
48K	Ar-Raqqa
34K	Al Bab
29K	Jebel Saman
24K	Jisr-Ash-Shugur
15K	Jarablus
13K	Qamishli

### GENDER

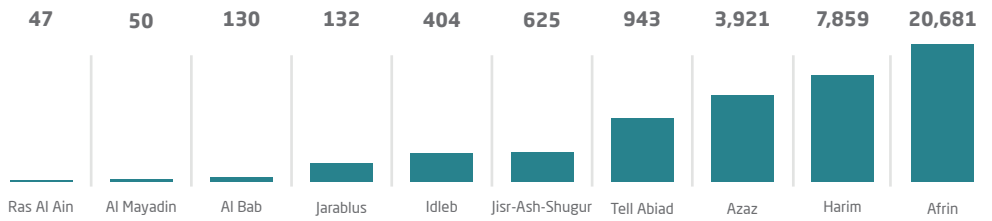

54%  
Females

46%  
Males

### DEPARTURES

34,874  
TOTAL NUMBER OF DEPARTURES

### Reasons for Departing

- 1 Their towns are not serviced
- 2 The lack of job opportunities in their towns
- 3 Humanitarian assistance is not provided in their towns
- 4 Shelling and clashes

### SHELTER TYPES FOR IDPs

Rented houses | 116,888  
Spontaneous camps | 161,668  
Borrowed houses | 139,648

Occupied houses | 1,276,841
